

LU-2800 Series

Semi-dry, Unison-feed, Lockstitch Machine with Vertical-axis Large Hook

High and semi-long arm has been adopted.
The long distance from the machine arm to the needle contributes to improved workability.

The LU-2800 Series is a unison-feed, lockstitch machine with a vertical-axis large hook which is provided with substantially improved functions and performance.

2-needle type

LU-2860

2-needle, Vertical-axis 2.0 Fold-Capacity Hook without automatic thread trimmer

LU-2860-7

2-needle, Vertical-axis 2.0 Fold-Capacity Hook with automatic thread trimmer

LU-2868AL-7

2-needle, Vertical-axis 2.7 Fold-Capacity Hook with automatic thread trimmer (long-pitch type)

Functions for improving seam quality and workability.

- ▶ The long distance from the machine arm to the needle contributes to improved workability

- ▶ Thread tightness can be kept same, even the multi-level of material.

Double tension provided as : standard

Single or Double can be set easy through Multi-functional 6-string switch, regarding the machine with trimmer.
(Available for more thick material)

Multi-functional 6-string switch (thread trimming switch)

In addition to the one-touch type reverse feed switch, a multi-functional 6-string switch is also provided. Changeover of the amount of the alternating vertical movement of the walking foot and the presser foot and changeover of the stitch length can be done simply with this one switch.

Walking-foot/presser-foot alternating vertical movement mechanism

The sewing machine has adopted a feed mechanism which keeps the ratio between the amount of the vertical movement of the walking foot and that of the presser foot constant even when the material is changed. The amount of the alternating vertical movement of the walking foot and the presser foot is 9 mm at the maximum. This amount can be set with ease by means of the large dial installed on the upper section of the sewing machine.

Mechanisms have been designed taking maintainability and

High-torque direct-drive motor is installed.

The sewing machine provided with a thread trimmer has adopted a high-torque direct-drive motor which is suitable for heavy-weight materials. As a result, the sewing machine is excellent at its responsiveness and ensures increased penetration into the material even when sewing multi-layered parts.

The direct-drive motor system has been adopted by all of the sewing machines with a thread trimmer. As a result, the sewing machine starts up swiftly and promises increased stop accuracy, thereby demonstrating improved responsiveness. In addition, the machine is no longer provided with a V-belt. This means that the adoption of the direct-drive motor is also effective in the elimination of belt shavings. Power is directly transmitted from the motor to the sewing machine, thereby contributing to reduced power consumption. (This sewing machine reduces power consumption by 37% as compared with the conventional models.) Adoption of a direct-driven main shaft and a revamping of mechanism design contribute to remarkably reduced noise. Noise has been reduced by 3.5dB as compared with the conventional model to produce this operator-friendly machine.

Dramatically advanced availability for material

Higher lift of the presser bar

A presser bar height of 20 mm is achieved when using the automatic presser bar lifting lever. Thanks to this feature, the process of joining leather and heavy-weight sponges, which are usually used as materials for expensive sofas, can be carried out with ease.

Eccentricity of the feed driving cam is adjustable.

Adjustment of the eccentricity of the feed driving cam has been enabled. As a result, the sewing machine is able to perform sewing with the feed that is best-suited to the material and thread used.

It is no longer necessary to prepare other subclass model sewing machines.

New lubrication system

Lubrication system is powerful and stable even low speed.

New bobbin thread spool device

New bobbin thread spool device is no necessity of rolling thread manually.

Stitch length can be changed over among different lengths.

The sewing machine with a thread trimmer is provided as standard with a 2-pitch dial. One unit of this sewing machine is able to sew different sewing lengths since the sewing length can be instantaneously changed over.

2.0 / 2.7 fold-capacity hook

LU-2810(-7)
LU-2860(-7)

LU-2818-7
LU-2828-7
LU-2868-7

The hook which can be adjusted with screw amount of needle guard contact to needle. The needle guard can be easily adjusted. Therefore, it prevents stitch skipping and wear of hook edge.

environmental friendliness into consideration.

Easy to find remaining oil quantity

* LU-2818-7/LU-2868-7

New-type tank style automatic lubrication mechanism has been adopted.

The oil dropped from the hook and its surrounding sections into the under-cover is filtered to remove dirt and dust and is then returned to the oil tank. This method saves the effort of oiling and reduces oil consumption. The remaining oil quantity indicator is provided on the front face of the machine head. Lubrication can be carried out without tilting the machine head.

JUKI ECO PRODUCTS

The LU-2810-7 is an eco-friendly product which complies with JUKI ECO PRODUCTS standards for protecting the environment.

- This sewing machine reduces power consumption by 37% as compared with the conventional models.
- As compared with the conventional model, LU-2810-7 reduces noise by 3.5 dB.
- The sewing machine complies with the "Juki Group Green Procurement Guidelines" on the use of hazardous substances, which is stricter than other restrictions, such as those of the RoHS Directive.

For details of JUKI ECO PRODUCTS, refer to: http://www.juki.co.jp/eco_e/index.html

*The RoHS Directive is an EU Directive limiting the use of 6 hazardous substances (lead, hexavalent chromium, mercury, cadmium, PBB and PBDE) in electrical and electronic equipment. The Juki Green Procurement Guideline is the voluntarily established criteria to eliminate not only the aforementioned six substances, but also other ones which also adversely affect the environment.

Cutting-edge Lineup

LU-2810

Semi-dry, 1-needle, Unison-feed, Lockstitch Machine with Vertical-axis 2.0 Fold-Capacity Hook

LU-2860

Semi-dry, 2-needle, Unison-feed, Lockstitch Machine with Vertical-axis 2.0 Fold-Capacity Hook

High and semi-long arm has been adopted. Wide machine bed area contributes to improved workability. Direct-drive, unison-feed, Lockstitch machine with a vertical-axis large hook providing substantially improved functions and performance.

LU-2860

LU-2828A-7

Semi-dry Direct-drive, 1-needle, Unison-feed, Lockstitch Machine with Vertical-axis 2.7 Fold-Capacity Hook (needle thread roll-in and shorter - thread remaining type)

The shorter-thread remaining type LU-2828A-7 is a high-performance sewing machine. It leaves a shorter thread on the material at the beginning of sewing by means of the needle thread clamp device, as well as at the end of sewing by means of the thread trimmer which is provided with a shorter-thread remaining function. This means that manual thread nipping both at the beginning and at the end of sewing is no longer required, thereby helping reduce operator fatigue. Thanks to the adoption of a 2.7-fold hook, the frequency of bobbin thread changing is reduced and workability is improved.

LU-2828-7

Beautiful finished seams

The material at the beginning of sewing → The material at the end of sewing

Surface side

The needle thread does not remain on the surface side of the material. (The needle thread clamp is turned ON.)

Back side

Remaining-thread length : 5mm

*LU-2828-7 can produce the effect of shorter-thread remaining by making condensed stitch

Needle thread clamping device

This device pulls the needle thread into the wrong side of the material at the beginning of sewing, thereby ensuring more beautifully-finished seams.

The shorter-thread trimming mechanism

(needle thread roll-in and shorter-thread remaining type)

The thread trimming mechanism has been completely renewed. The industry's shortest remaining thread length achieved by trimming the thread close to the fixed knife at the last stitch (condensed stitch). (The length of remaining needle thread is 5mm)

LU-2810-7

Semi-dry Direct-drive, 1-needle, Unison-feed, Lockstitch Machine with Vertical-axis 2.0 Fold-Capacity Hook with automatic thread trimmer

LU-2860-7

Semi-dry Direct-drive, 2-needle, Unison-feed, Lockstitch Machine with Vertical-axis 2.0 Fold-Capacity Hook with automatic thread trimmer

High and long arm has been adopted. The machine is suited to the sewing of car seats, sofas and bags. It is a sewing machine provided with dramatically improved workability and functions which are required for sewing large products and extra heavy-weight materials.

LU-2810-7

LU-2818AL-7

Semi-dry Direct-drive, 1-needle, Unison-feed, Lockstitch Machine with Vertical-axis 2.7 Fold-Capacity Hook with automatic thread trimmer (long-pitch type)

LU-2868AL-7

Semi-dry Direct-drive, 2-needle, Unison-feed, Lockstitch Machine with Vertical-axis 2.7 Fold-Capacity Hook with automatic thread trimmer (long-pitch type)

This model is the most-desired sewing machine for sewing furniture such as sofas. It is best-suited to topstitching with a long stitch pitch. During the topstitching process, the longer distance from the machine arm to the bed, in particular, effectively demonstrates the machine's improved workability.

LU-2868AL-7

Long-pitch

Long pitch sewing is suitable for decoration sewing of furniture etc.

Long-pitch
(The maximum stitch length is 12mm at the pitch dial.)

General stitch length is 6 mm.

2.7 fold-capacity hook

With the adoption of this vertical-axis 2.7 fold-capacity hook, the frequency of bobbin thread winding is reduced, promising sewing work of increased efficiency.

The hook which can be adjusted with screw amount of needle guard contact to needle.

*Place an order for the walking foot and presser foot as a set.

■ ATTACHMENTS

Suspended ruler H152

Description	Parts No.
Suspended ruler (asm.) H152	MAH-152010A0
Screw	SM6061402TP x2

■ SPECIFICATIONS

Model name	LU-2810	LU-2860	LU-2810-7	LU-2860-7
Type	1-needle	2-needle	1-needle with automatic thread trimmer	2-needle with automatic thread trimmer
Max. sewing speed	3,000sti/min	2,700sti/min	3,000sti/min	2,700sti/min
Max. stitch length	9mm			
Stitch length dial	1 pitch dial		2 pitch dial	
Presser foot	Auto: 20mm, By hand: 10mm			
Auto lifter	Option		Provide as standard	
Alternating vertical movement	1~9mm			
Alternating vertical movement adjusting method	Large dial			
DL device	—		Provide as standard	
Needle thread tension	Double-tension		Single/Double-tension	
Hook	Vertical axis 2 fold-capacity hook			
Bottom-feed micro-adjustment mechanism	Provided as standard			
Needle	135x17 Nm160 (Nm125~Nm180)			
Thread	#30~#5, B46~B138, Nm=60/3~20/3			
Lubrication	Semi-dry head automatic (Tank system)			
One-touch type reverse feed switch	—		Provide as standard	
Hand switch	—		Multi-functional 6-string switch	
Safety mechanism	Provided as standard (reset with the push of a button)			
Power requirement / Power consumption	—		Single-phase 100~120V / 200~240V , 3-phase 200~240V / 180VA (with automatic thread trimmer)	
Machine head weight	56kg	61kg		66kg

*"sti/min" stands for "Stitches per Minute."

Model name	LU-2818AL-7	LU-2868AL-7	LU-2828A-7
Type	1-needle, Vertical-axis 2.7 Fold-Capacity Hook with automatic thread trimmer (long-pitch type)	2-needle, Vertical-axis 2.7 Fold-Capacity Hook with automatic thread trimmer (long-pitch type)	1-needle, Vertical-axis 2.7 Fold-Capacity Hook with automatic thread trimmer (needle thread roll-in and shorter - thread remaining type)
Max. sewing speed	3,000sti/min	2,700sti/min	3,000sti/min
Max. stitch length	12mm		9mm
Stitch length dial	2 pitch dial		
Presser foot	Auto: 20mm, By hand: 10mm		
Auto lifter	Provide as standard		
Alternating vertical movement	1~9mm		
Alternating vertical movement adjusting method	Large dial		
DL device	Provide as standard		
Needle thread tension	Single/Double-tension		
Hook	Vertical axis 2.7 fold-capacity hook		
Bottom-feed micro-adjustment mechanism	Provided as standard		
Needle	135x17 Nm160 (Nm125~Nm180)		134x35 Nm140 (Nm125~Nm180)
Thread	#30~#5, B46~B138, Nm=60/3~20/3		
Lubrication	Semi-dry head automatic (Tank system)		
One-touch type reverse feed switch	Provide as standard		
Hand switch	Multi-functional 6-string switch		
Safety mechanism	Provided as standard (reset with the push of a button)		
Power requirement / Power consumption	Single-phase 100~120V / 200~240V , 3-phase 200~240V / 180VA (with automatic thread trimmer)		
Machine head weight	66kg	68kg	62kg

*"sti/min" stands for "Stitches per Minute."

■ WHEN YOU PLACE ORDERS

Please note when placing orders, that the model name should be written as follows:

without automatic thread trimmer

Machine head

[1-needle type]

Gauge type	Code
Standard gauge	S
Gauge for europe	A

LU2810 **S**

Alternating vertical dial	Code
Provided	S

[2-needle type]

Gauge type	Code	Alternating vertical dial	Code
Standard gauge	S	Provided	S
Gauge for europe	A		

LU2860 **S**

* In case of "S" type in Gauge type, please choose from below.

Needle Gauge	Code	Needle Gauge	Code
3.2mm	C	7.9mm	H
4.8mm	D	9.5mm	K
6.4mm	F	12.7mm	L

* In case of "A" type in Gauge type, please choose from below.

Needle Gauge	Code	Needle Gauge	Code
4mm	A	10mm	D
6mm	B	12mm	E
8mm	C		

with automatic thread trimmer

Machine head

[1-needle type]

Head type	Code	Gauge type	Code	Wiper and one-touch type reverse feed		
Standard type	10	Standard gauge	S	Wiper	One-touch type reverse feed	Code
2.7 fold-capacity hook and long-pitch type	18	Gauge for europe	A	Not provided	Provided	0B
2.7 fold-capacity hook, needle thread roll-in and shorter - thread remaining type	28		AL			

*LU-2818 can be select only "AL".
*LU-2828 can be select only "A".

LU28 **70BBS**

Control Box	Code	Automatic foot lifter	Code	Alternating vertical dial	Code
