PARTNER

TAJIMA DG | BY PULSE

creative personalization

Unleash your creativity with **Tajima DG16 by Pulse!** DG16 offers more ways to creatively personalize products than ever before. Make any design uniquely your own with new fonts, features, stitch types and editing tools.

Then, take your designs online with the brand-new PulseCloud designer, enabling you

to create original designs or edit existing designs from your mobile device.

Store up to 100,000 designs and share them with friends and customers on social media with your PulseCloud account. You can also use PulseCloud to check on your machine status and productivity while you're away from the production floor.

ColorIT is a new feature that can apply a color theme to a design, make it monochromatic or automatically adjust the tint to darker or lighter threads. Quickly click through various options until you find the perfect color combination.

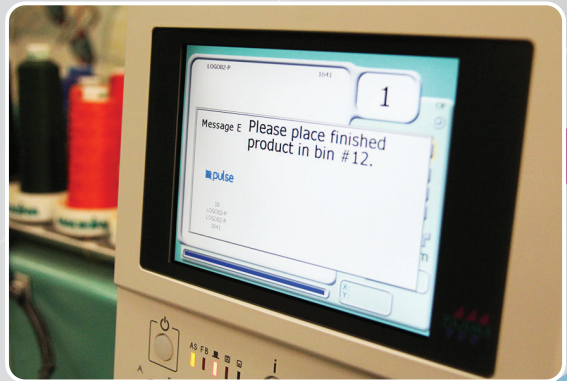

WordIT is a new tool to easily create a word collage made up of many text segments inside an artistic outline of your choice. You can select from many available outlines or create your own!

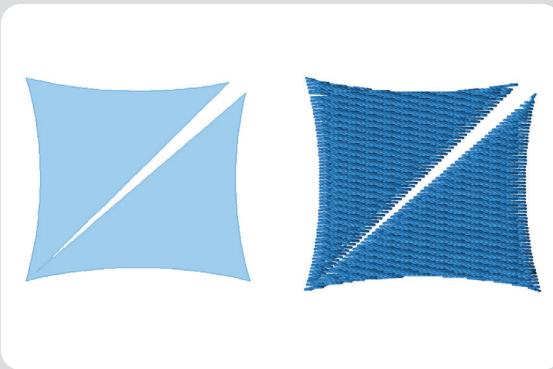

PulseCloud

All new freeform designer, accessible from anywhere by modern PCs, phones or tablets.

Machine Integration

Set machine speed and send messages to operators from your DG16 software.

Import Vector Graphics

Import artwork from Adobe Illustrator® and CorelDRAW® directly into DG16.

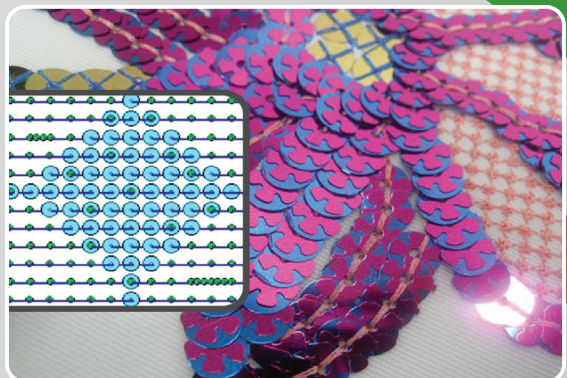

Exclusive Tajima Features

Support for Tajima LAN-enabled machines, sending designs and collecting machine performance data.

Fonts

Best collection of quality fonts with auto kerning and closest-point connection.

Laser/Sequin/Chenille/Rhinestone

Create exciting multi-media designs using a wide array of embellishment techniques.
