

GERBERSpreader XLs125

An affordable automated spreading solution that assures material rolls weighing up to 125 kgs (276 lbs.) are spread without tension and edges are aligned perfectly.

The XLs125 is designed for maximum performance, repeatability and productivity.

Available for left- or right-hand operation.

Cradle feed system provides tension-free spreading

Intuitive graphical touch-screen simplifies operator training and use

Get exceptional quality and performance in a tension-free spreading system at an affordable price.

Achieve maximum performance.

- The GERBERSpreader™ XLs125 offers the flexibility for a wide variety of applications.
- Designed for maximum performance, repeatability and productivity.
- The XLs125 spreads woven or knit materials in roll or flat-folded form.
- Supports most common spreading modes.

Reduce raw material costs.

- The XLs125 ensures predictable, tension-free spreading of material.
- Provides accurate and consistent spread length.
- Accurately aligns material edges so parts can be nested closer to the ends and edges of material to optimize material utilization.
- Repeatability insures more accurate cut pieces and lower rejection rate in the sewing room

Experience reliability.

- The XLs125's reliable, robust construction and strength of design ensures minimal downtime in typical use and easy maintenance with existing resources.

Enjoy ease of use.

- Material roll cradle feed system tilts automatically for easy material loading and unloading.
- The XLs125 also features a simplified icon-driven user interface that is easy to learn and easy to train new users to operate.
- Available in English, Spanish and simplified Chinese.

Choose an affordable investment.

- The XLs125 provides a new low total acquisition cost by offering the most affordable purchase price ever.
- Low installation, training and other one-time costs.
- Low ongoing costs for parts and maintenance labor.

XLs125

Available Options & Services

- Available for left- or right-hand operation
- Zigzag equipment with end catchers
- Zigzag equipment without end catchers
- Moveable end catchers
- Flat-fold attachment
- Smoothing roller
- Cloth bar
- Remote emergency stop
- Timing belt for length setting
- Operator platform
- Complete service and parts supply packages
- Comprehensive operator and technician training
- Paperstand for One roll of tissue paper
- Plate under rear cradle belt for light material
- Tray for extra material roll. Max roll weight 75 kg

Optional platform allows operator to ride alongside the table

Movable end catcher for face-up one-way or face-to-face (zigzag) spreading

System Features

- Front cradle belt plate for support of light material
- Special bar for reverse wound material
- Automatic cutting device with adjustable sharpening interval
- Electronic edge control
- Variable speed control
- No cloth stop function
- Ply counter
- Programmable lay length and end allowance settings
- Service prompts
- Operator-side safety device

Spreading Modes Supported

- Face-up one-way with or without end catchers
- Face-to-face with or without end catchers

NOTE: Configurations vary according to options selected.

Technical Specifications

Characteristics

Material Width	160, 180, 200, 220, 240 cm	63, 71, 79, 87, 94 in
Roll Weight (maximum)	125 kg	276 lbs
Roll Diameter (maximum)	65 cm	26 in
Spread Height Face Up One Way (max)	20 cm	8 in
Spread Height Face to Face with End Catcher (max)	12 cm	5 in
Spreader Speed (maximum per minute)	100 m	109 yds
Loading Height over Table Top	44 cm	17 in
Total Height over Table Top with Full Size Roll	90 cm	35 in
Table Width	Machine width + 20 cm	Machine width + 8 in

Power

Power supply	1x220-240V / 3x220-240V / 3x380-415V
Main Fuse	16 Amp

Operating Environment

Temperature (maximum)	43°C	110° Fahrenheit
Humidity (maximum)	95% (non-condensing)
